ReadMe

For testing ExactInference
Compile: java *.java
Run: BNExactInferencer aima-wet-grass.xml R S true
  or BNExactInferencer aima-alarm.xml B J true M true

For testing InexactInference
Compile: java *.java
Run: java RejectionSampling 1000 aima-wet-grass.xml R S true
or   java RejectionSampling 100000 aima-alarm.xml B J true M true
or   java Likelihood 1000 aima-wet-grass.xml R S true

I strongly recommend running aima-alarm.xml B J true M true at least 100,000 times since generating J true M true is small chance event.
